Profile

I am a freelance digital designer and front-end developer, specialising in clean and practical user interface design and standards-compliant, accessible front-end coding.

I have been freelance since 2013 and have worked extensively across the whole spectrum of front-end; from UX, to screen design, to development.

I have a high level of competence in HTML, CSS and javascript development, as well as a solid grounding in UX, interaction modelling, wireframing and user flows.

I am also well versed in typography, layout and colour theory, and have an expert knowledge of design tools such as Adobe Photoshop, Sketch, and Illustrator.

Experience

FIXED-TERM CONTRACT

European Patent Office / Front-End Developer
AUGUST 2015 - PRESENT, MUNICH / THE HAGUE

Development of a web-application prototype, based on React.js and Redux, translating wireframes into working screens for validation and user-testing.

Superdry / Digital Designer
MAY 2015 - AUGUST 2015, CHELTENHAM

Design and development for Superdry's European email marketing campaigns.

European Patent Office / Front-End Developer
MAY 2014 - DECEMBER 2014, MUNICH

Part of the production of a web-application prototype, based on HTML5, Backbone.js and jQuery. Javascript development, css architecture and interaction design.

Zurich UK / Front-End Developer
NOVEMBER 2013 - MARCH 2014, GLOUCESTERSHIRE

Front-end development on a customer-facing 'infosite', including the creation of a bespoke css framework to be used by other developers and the creation of custom javascript widgets.

TDA / Interactive Designer

OCTOBER 2010 - MARCH 2013, CHELTENHAM

Part of the digital department in an award-winning marketing agency. An 'all-round' role, encompassing UX, digital artwork and front-end development for websites, micro-sites, apps and games.

Rancon | Mini World Games / Web Developer

NOVEMBER 2007 - MARCH 2009, CHELTENHAM

Actionscript (flash) development for apps and games, as well as design of graphical assets and traditional front-end development.
